

BI Data Catalog Search

Catalog Search and Results

To begin search for available data resources select

The sign-on page for the BI Data Catalog:

Logon with:

- UPI number
- network password
- wh

The BI Data Catalog can be searched for a business or data asset term or as a repository of the data assets available to each user based on their profile.

Enter a key word or asset desired

i.e “Country”, “Staff”, “Project”

Searches are simple. Searches do not support complex expressions, such as those containing AND and OR.

Searching is case-insensitive. It does not matter what case you use when typing search terms.

Which resources you can see depends on your access rights.

Results of search are returned that have the key word in the asset name or in the title or in the content.

I.e. "Country"

Results for:

- V_Country
- V_Project
 - country_code
 - country name

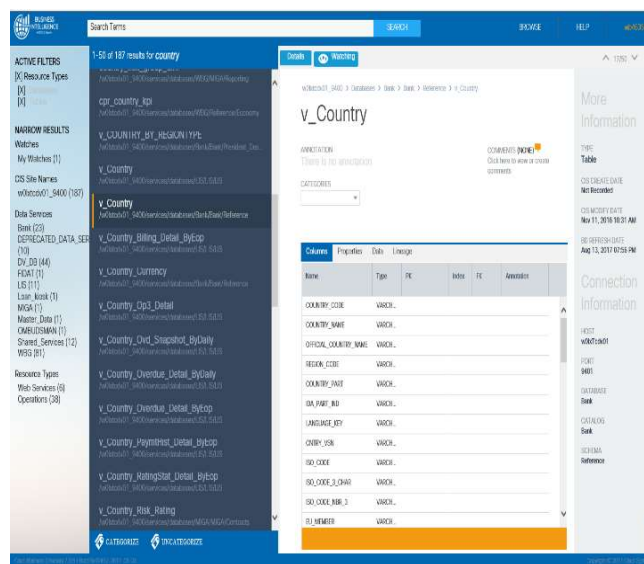

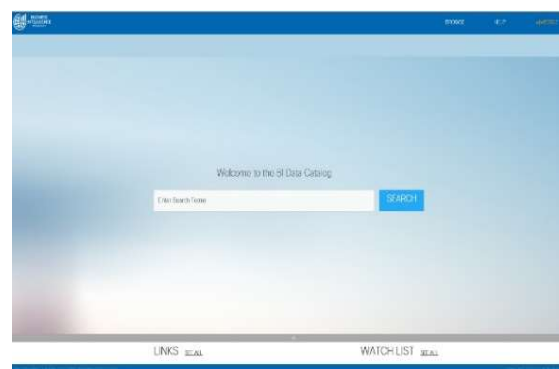

ACTIVE FILTER: narrow search to services or resource type.

Minimizes search results
and expands detail results.

Watching will tag an asset for you to be notified of changes or updates.

Detail Analysis and Inquiry

Get the data asset details such as metadata, lineage, access policies like governance, usage and how to get access.

For detail review of a selected resource:

Columns: listed (scroll bar on right)

Name
Datatype
Primary Key
Index on column
Foreign Key
Annotation

Properties: User defined characteristics

The custom properties can be used to facilitate additional logic or reporting that can be driven from the information stored in Business Directory.

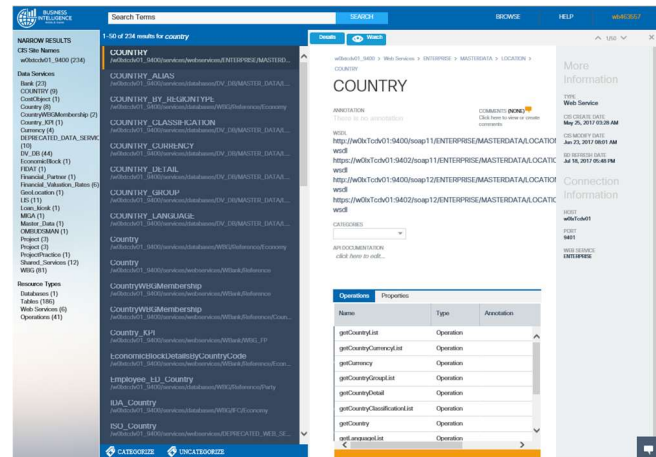

Data: Sample data can be selected

- based on permissions granted
- first 100 rows are displayed
- scroll bars on window to view results

Lineage: Tree structure of data source for asset

This information can help you understand:

- What is affected by a proposed change to a column or resource.
- How a published resource is provided to a consuming application, so that you can trace dependencies back to their origins.
- What you might need to have privileges for, because of resource dependencies.

Columns	Properties	Data	Lineage			
Name		Type	PK	Index	FK	Annotation
COUNTRY_CODE		VARCHAR(3)				
COUNTRY_NAME		VARCHAR(15)				
OFFICIAL_COUNTRY_NAME		VARCHAR(60)				
REGION_CODE		VARCHAR(2)				
COUNTRY_PART		VARCHAR(4)

COUNTRY_CODE	COUNTRY_NAME	OFFICIAL_COUNTRY...	REGION_CODE	COUNTRY_PA
NC	New Caledonia	New Caledonia	3	NULL
NE	Niger	Republic of Niger	1	II
NF	Norfolk Island	Norfolk Island	0	NULL
NG	Nigeria	Federal Republic of N...	1	II

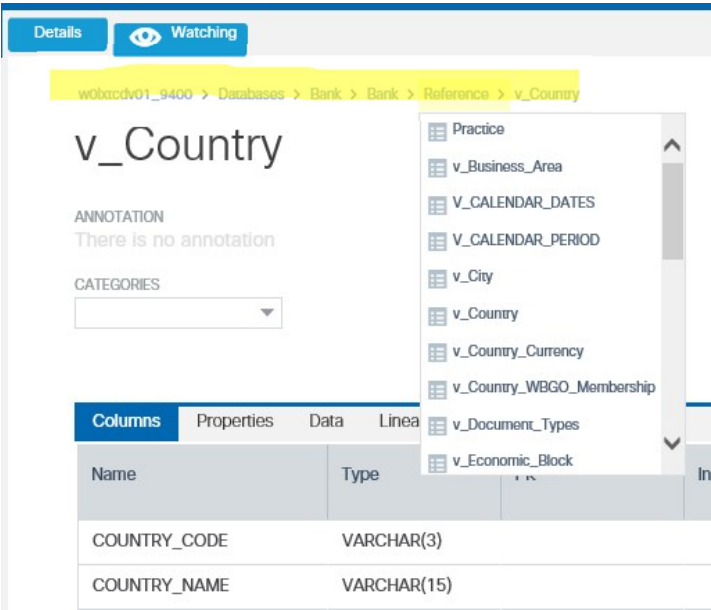

Search Shortcuts

The catalog path at top of search results is active and can be selected to navigate to other parts of the data catalog.

Search can be at any level of the catalog tree and will display other results available at that level. Shown are all the objects available in 'Bank/Reference' regardless of the original search key word.

Any part of the path can be selected to display folders or assets available at that level.

BROWSE

 Browse option in tool bar will open an explorer bar on left for the available catalog to explore.

Tree structure is displayed of the available assets that can be explored the same as entering a search term.
